Description

Silicone Protective Case with USB flap for Opticon **OPN-3002** & **OPN-4000** (*1)

This silicone cover fully encloses the scanner, protecting your scanner investment against intrusion from dust and dirt. This will save money and time on repairs. The USB flap covers the mini USB connection.

*(*1) Barcode scanner NOT included.*

The anti-skid surface structure provides a good grip. Even though there are no openings for the beeper it still can be heard. The large scan button is covered and feels natural to operate as the design follows the scanners' contours. Also the bright LED is still visible as well. Below the large scan button a little raised bubble enables easy access to the small function button.

Be aware that the OPN-3002 & OPN-4000 won't fit in any docking station when fitted in the SPF-3 case.
For this you should combine any SPC-3 case with the 'SPC' model docks (i.e. CPN-6SPC, CPN-30SPC).

Former article number: Opticon 13401
