

CMT-1 (v2)

Docking station for Opticon models OPN-2001, OPN-2005 and OPN-2006

The CMT-1 (v2) is a single-bay docking station to easily manage one Opticon OPN-2001, OPN-2005 or OPN-2006. The increased height of the CMT-1 (v2) model offers easier insertion of the scanner and better stability.

Ease of use by having your scanner in a fixed position instead of searching for cables on a daily basis. And, while inserted, your OPN is securely stored as well.

Both charging and communication capabilities are available. The dock itself uses no power, the OPN can be powered through the PC's USB port.

CMT-1 (v2) with OPN-2001
**barcode scanner NOT included*
