

CPN-1

Docking Station for Opticon models OPN-3002 and OPN-4000

A single-bay docking station to accommodate a single Opticon OPN-3002i/n or OPN-4000i/n.

Easily and securely store and charge your OPN in the CPN-1. The dock itself uses no power, the OPN can be powered while placed in the dock as usual, for instance through the PC's USB port. Optional power supplies are available in case you wish to charge your OPN while the PC is switched off or if you want to charge the OPN in your car.

Other new functionality like USB communication to transfer scanned data will only become available if Opticon releases new firmware that supports this.

CPN-1 shown with OPN-3002n (scanner NOT included)
