Description

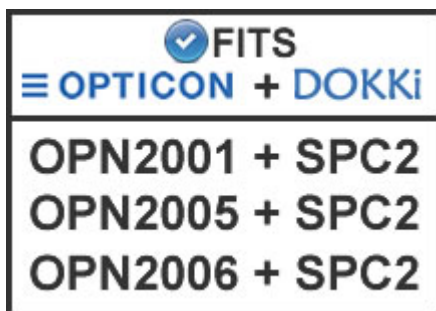

Single-bay docking station for **Opticon OPN2001**, **OPN2005** and **OPN2006**. (*1)

Specifically designed to fit the Opticon OPN-2001, OPN-2005 or OPN-2006 **with our SPC-2 Silicone Protective Case installed**. Enjoy the additional protection of the DOKKi SPC-2 case whilst still being able to dock the scanner without having to remove the silicone case before docking.

The increased height of this new model offers easier insertion of the scanner and better stability.

Ease of use by having your scanner in a fixed position instead of searching for cables on a daily basis. And, while inserted, your OPN is securely stored as well. Both charging and communication capabilities are available. The dock itself uses no power, the OPN can be powered through the PC's USB port. Optional separate power supplies are available in case the OPN needs to be charged while the PC is switched off. A car charger is available as well.

- elegant design;
- easy and simple to use;
- no more searching for your USB cable;
- single handed operation;
- charging and communication (via USB);
- appropriate Opticon OPN driver, dock itself needs no driver (only necessary for communication);
- use the USB cable that came with your scanner.

(*1) Barcode scanners NOT included.
