

Description

Silicone Protection Case [GREY] for usage with DOKKi 'SPC' model docks on Opticon **OPN-2001**, **OPN-2005** & **OPN2006** (*1)

This silicone case is designed to operate in conjunction with our 'SPC' docks, like the CMT-6SPC and CMT-30SPC. The case encloses the scanner, offering additional protection, while the USB port has been kept open to enable being docked.

(*1) Barcode scanner NOT included.

The anti-skid surface structure provides a good grip. Even though there are no openings for the beeper it still can be heard. The large scan button is covered and feels natural to operate as the design follows the scanners' contours. Also the bright LED is still visible as well. Below the large scan button a little raised bubble enables easy access to the small 'erase' button.

If docking functionality isn't needed but even better protection is desired then the SPF-2 cases, equipped with USB flap to cover the scanner's USB port, are available as an alternative.
