CPN-6

6-bay docking station for Opticon OPN-3002 and OPN-4000

This unique 6-bay docking station can handle any mix of up to six OPN-3002i's, OPN-3002n's, OPN-4000i's and OPN-4000n's.

The CPN-6 can be used for charging and USB-HID communication. By design USB-HID emulates keyboard input and should be manually limited to one scanner transmitting data at a time. New functionality like USB (VCP) communication will only become available if Opticon releases new firmware that supports this.
